

Proceedings
of the
FLORIDA STATE
Horticultural Society
1967

VOLUME LXXX

PRINTED MAY 1, 1968

CONTENTS

Officers for 1967	IV
Officers for 1968	V
Constitution and By-Laws	VI
Awards of the Society	XVIII
Awards for Outstanding Papers	XVIII
List of Presidentns	XIX
Honorary Members	XX
Award of Honorary Memberships	XXI
President's Annual Address, Ed H. Price, Jr., Bradenton	XXVII
Agriculture: The Legislative Story, Hon. Jerry Thomas, Florida State Senator, Thirty-fifth District	XXIX
Changing Transportation, Gordon Stedman, Executive Vice President, Growers and Shippers League of Florida, Orlando	XXXIII

CITRUS SECTION

A Comparison of Three Nitrogen Sources on Mature Valencia Orange Trees, Paul F. Smith, Crops Research Division, Agricultural Research Service, U. S. Department of Agriculture, Orlando	1
The Acceleration of Abscission and Coloring of Citrus Fruit, William C. Cooper and W. H. Henry, Crops Research Division, Agricultural Research Service, U. S. Department of Agriculture, Orlando	7
Improved Fertilizer Material Gives Reduced Perchlorate Toxicity Symptoms, R. L. Reese, University of Florida Citrus Experiment Station, Lake Alfred	15
Effects of Phosphate Fertilizer on Young Citrus Trees on Flatwood Soils, C. A. Anderson, University of Florida Citrus Experiment Station, Lake Alfred, and D. V. Calvert, University of Florida Indian River Field Laboratory, Fort Pierce	19

Effects of Soil Amendments on Soil Moisture and Growth of Young Orange Trees, R. C. J. Koo, University of Florida Citrus Experiment Station, Lake Alfred	26
Variability of Root and Soil Analyses of a Valencia Grove Sampled in January, E. A. Brams, University of Illinois, Urbana, Illinois, and J. G. A. Fiskell, Soils Department, University of Florida, Gainesville	32
The Influence of Seeds and Pollen Source on the Size of Fruit, A. H. Krezdorn, Department of Fruit Crops, University of Florida, Gainesville	37
Influence of Oil Emulsions on Absorption of Carbon Dioxide by Citrus, J. M. Riedhart, Kennett Copper Corporation, Special Products Division, Waterbury, Connecticut	43
Sphaeropsis Knot; a New Disease of Rough Lemon Rootstock, C. H. Blazquez and P. Hunt, Citrus Research Botany Department, University of West Indies, Mona, Kingston, Jamaica	46
Cold Damage to Young Mandarin-Hybrid Trees on Different Rootstocks in Flatwood Soil, G. Yelenosky and C. J. Hearn, Crops Research Division, Agricultural Research Service, U. S. Department of Agriculture, Orlando	53
Burrowing Nematode Resistant Rootstocks as Biological Barriers in Citrus Groves, Harry W. Ford, University of Florida Citrus Experiment Station, Lake Alfred	56
Herbicides Used in Florida Citrus Groves, C. I. Hannon, C. M. Goodman, Plant Science Associates, Inc., Lake Alfred, J. R. King and H. L. Swain, W. R. Grace & Co., Agricultural Products Division, Fort Pierce	59
Population Fluctuations of Burrowing Nematodes in Florida Citrus Groves, E. P. DuCharme and R. F. Suit, University of Florida Citrus Experiment Station, Lake Alfred	63
Symptoms of Xyloporosis (Cachexia) Virus on Robinson and Lee Tangerine Hybrids, C. O. Youtsey, Division of Plant Industry, Florida Department of Agriculture, Winter Haven, and A. L. Bentley, Division of Plant Industry, Florida Department of Agriculture, Leesburg	67
Exocortis Virus of Citrus Can Be Spread by Contaminated Tools, S. M. Garnsey, Crops Research Division, Agricultural Research Service, U. S. Department of Agriculture, Orlando	68
GC-9160 and Other Materials for Citrus Rust Mite Control, Roger B. Johnson, University of Florida Citrus Experiment Station, Lake Alfred	73
Certain Physiological Changes in Sweet Orange Seedlings During Treatment with N-Decenylsuccinic Acid in Solution Cultures, G. K. Rasmussen, Crops Research Division, Agricultural Research Service, U. S. Department of Agriculture, Orlando	76
Flood Irrigation Studies with Citrus, D. V. Calvert, University of Florida Indian River Field Laboratory, Fort Pierce, R. C. J. Koo, and H. W. Ford, University of Florida Citrus Experiment Station, Lake Alfred	79
<i>Poncirus Trifoliata</i> and some of its Hybrids as Rootstocks for Valencia Sweet Orange, F. E. Gardner and G. E. Horanic, Crops Research Division, Agricultural Research Service, U. S. Department of Agriculture, Orlando	85

Growth and Productivity of Virus-Infected Valencia Orange Trees on Twenty-Five Rootstocks, F. E. Gardner, D. J. Hutchison, G. E. Horanic, and P. C. Hutchins, Crops Research Division, Agricultural Research Service, U. S. Department of Agriculture, Orlando	89
Testing a Prototype Low Pressure Oil Burning Heating System, G. R. Davis, Federal-State Frost Warning Service, Lakeland, and J. F. Gerber, Department of Fruit Crops, University of Florida, Gainesville	93
Harvesting Early and Midseason Citrus Fruit with Tree Shaker Harvest Systems, G. E. Coppock, Florida Citrus Commission, University of Florida Citrus Experiment Station, Lake Alfred	98
Co-Operative Marketing of Citrus Fruits, F. R. Wilcox, Formerly Manager, Sunkist Growers Cooperative, Los Angeles, California	105
A Grove Record Map—What It Can Tell, C. I. Hannon, Plant Science Associates, Inc., Lake Alfred	107

VEGETABLE SECTION

Tropi-Red and Tropi-Gro—New Disease Resistant Tomatoes for the Fresh Market, J. W. Strobel, University of Florida Sub-Tropical Experiment Station, Homestead, J. M. Walter, University of Florida Gulf Coast Experiment Station, Bradenton, N. C. Hayslip, University of Florida Indian River Field Laboratory, Fort Pierce, and P. H. Everett, University of Florida South Florida Field Laboratory, Immokalee	112
Insecticide Treatments for the Control of Potato-Infesting Wireworms, R. M. Baranowski, University of Florida Sub-Tropical Experiment Station, Homestead.....	115
Yield and Quality From Celery Transplants Hardened by Topping and Growth Retardants, V. L. Guzman, Everglades Experiment Station, Belle Glade.....	117
Carrot Variety Trials in Central Florida, R. B. Forbes, Central Florida Experiment Station, Sanford	123
Snap Bean Yields Following Simulated Insect Defoliation, G. L. Greene, Central Florida Experiment Station, Sanford, and D. R. Minnick, Department of Entomology, University of Florida, Gainesville	132
Marginal Leaf Blight of Lettuce, R. D. Berger, Everglades Experiment Station, Belle Glade	134
Superior New Strawberry Clones Resist Verticillium Wilt, J. W. Strobel, University of Florida Sup-Tropical Experiment Station, Homestead	138
Influence of Lime on the Development of Fusarium Wilt of Watermelons, P. H. Everett and C. H. Blazquez, South Florida Field Laboratory, Immokalee	143
Effects of Plant Populations, Fertilizer Rates on Tomato Yields on Rockdale Soil, H. H. Bryan, J. W. Strobel, University of Florida Sub-Tropical Experiment Station, Homestead, and J. D. Dalton, Associate County Agent, Agricultural Extension Service, Homestead	149
Efficacy of Some Experimental Nematicides Applied In-The-Row on Vegetables, H. L. Rhoades, Central Florida Experiment Station, Sanford, and J. F. Beeman, Sylvania Electric Products, Inc., Towanda, Pennsylvania	156

Efficacy of New Fungicides for Control of Gray Leaf Spot of Tomatoes, Robert A. Conover, University of Florida Sub-Tropical Experiment Station, Homestead	162
Effect of Fertilizer Placements and Rates on Watermelon Yields, J. G. A. Fiskell, Soils Department, University of Florida, Gainesville, S. J. Locascio, Vegetable Crops Department, University of Florida, Gainesville, P. H. Everett, University of Florida South Florida Field Laboratory, Immokalee, and H. W. Lundy, University of Florida Suwanee Valley Experiment Station, Live Oak	168
Effects of Potassium Source and Rate and Nitrogen Rate on Strawberry Tissue Composition and Fruit Yield, S. J. Locascio and G. K. Saxena, Vegetable Crops Department, University of Florida, Gainesville	173
Corynespora Leaf Spot of Cucumber, C. H. Blazquez, University of Florida South Florida Field Laboratory, Immokalee	177
Influence of Potassium Fertilizer on Severity of Tomato Graywall, N. C. Hayslip, Indian River Field Laboratory, Fort Pierce, and J. R. Iley, W. R. Grace Co., Paramonga, Peru	182
Placement of Liquid and Dry Fertilizer for Vegetable Crops, V. F. Nettles, University of Florida, Gainesville, and W. C. Hulburt, Agricultural Engineering Research Division, Agricultural Research Service, U. S. Department of Agriculture, Athens, Georgia	193
Influence of Surface Mulches on Growth of Potatoes, D. R. Hensel, Potato Investigations Laboratory, Hastings	186
Influence of Plastic Mulch on Sand and Soil Rot on Tomatoes, L. H. Halsey, R. C. Fluck, Agricultural Experiment Station, Gainesville, and J. F. Beeman, Sylvania Corp., Towanda, Pennsylvania	200
Mechanizing the Harvesting and Post-Harvest Handling of Snap Beans, Celery and Sweet Corn, R. K. Showalter, Department of Food Science, University of Florida, Gainesville	203
Sprinkler Irrigation of Strawberries for Freeze Protection, S. J. Locascio, D. S. Harrison, and V. F. Nettles, Institute of Food and Agricultural Sciences, University of Florida, Gainesville	208
Response of Several Vegetable Crops to Underground Asphalt Moisture Barrier in Lakeland Fine Sand, G. K. Saxena, L. C. Hammond, Soils Department, University of Florida, Gainesville, and H. W. Lundy, Suwanee Valley Experiment Station, Live Oak	211
Mulch Treatments of Squash and Tomatoes with Respect to Virus Infections and Yields, D. O. Wolfenbarger, University of Florida Sub-Tropical Experiment Station, Homestead, and William D. Moore, U. S. Department of Agriculture Retired, Fort Lauderdale	217

HANDLING AND PROCESSING SECTION

Characteristics of Oranges from Five-Year-Old Trees, A. H. Rouse, University of Florida Citrus Experiment Station, Lake Alfred	222
Chemical Abscission Studies of Citrus Fruit, W. C. Wilson, Florida Citrus Commission, University of Florida Citrus Experiment Station, Lake Alfred	227

Cost and Volume Relationships for Picking, Hauling, and Packing and Selling Florida Oranges, T. E. Floyd, The Coca-Cola Company, Atlanta, Georgia, Max R. Langham and A. H. Spurlock, University of Florida, Gainesville	241
Simulated Marketing Tests with Prepackaged Citrus, W. Grierson and F. W. Hayward, University of Florida Citrus Experiment Station, Lake Alfred	237
Thiabendazole, and Exceptional Fungicide for Fresh Citrus Fruit, A. A. McCornack and G. Eldon Brown, Florida Citrus Commission, University of Florida Citrus Experiment Station, Lake Alfred	232
Postharvest Decay of Specialty Hybrid Citrus Fruits in Relation to Degreening Time, John J. Smoot and C. F. Melvin, Market Quality Research Division, Agricultural Research Service, U. S. Department of Agriculture, Orlando	246
Factors Affecting the Flavor of Frozen Concentrated Orange Juice, E. L. Moore, Florida Citrus Commission, University of Florida Citrus Experiment Station, Lake Alfred, F. W. Wenzel, University of Florida Citrus Experiment Station, Lake Alfred, and Frank G. Martin, University of Florida, Gainesville	250
Citrus Tissue Culture as a Means of Studying the Metabolism of Carotenoids and Chlorophyll, M. F. Oberbacher, Florida Citrus Commission, University of Florida Citrus Experiment Station, Lake Alfred	254
Nitrogen Content of Florida Orange Juice and Orange Juice Concentrate, S. V. Ting, Florida Citrus Commission, University of Florida Citrus Experiment Station, Lake Alfred	257
Changes in Organic Nitrogen Including Free Amino Acids During Processing of Florida Orange Concentrate, Mohamed A. Ismail and Richard W. Wolford, Florida Citrus Commission, University of Florida Citrus Experiment Station, Lake Alfred	261
Relationship of Bacterial Contamination in Orange Oil Recorevy System to Quality of Finished Product, D. I. Murdock, G. L. Hunter, W. B. Bueck, and J. A. Brent, Minute Maid Company, A Division of The Coca-Cola Company, Orlando	267
Relation of Pressure and Moisture for Densifying Foam-Mat Dried Orange and Grapefruit Juice Crystals, R. E. Berry, C. J. Wagner, Jr., and Stephen Wolfe, U. S. Fruit and Vegetable Products Laboratory, Agricultural Research Service, U. S. Department of Agriculture, Winter Haven	280
An Improved Method for Measurement of Pulp Content of Citrus Juices, M. D. Maraulja and R. W. Barron, Florida Citrus Commission, University of Florida Citrus Experiment Station, Lake Alfred	284
Cottonseed Protein Processing and Utilization—An Example of Nutritional Food Technology, R. P. Bates, Department of Food Science, University of Florida, Gainesville	289
Recovery of Volatile Flavors from Celery, C. W. Wilson, III, A. M. Neubert, M. K. Veldhuis and W. H. Miller, U. S. Fruit and Vegetable Products Laboratory, Agricultural Research Service, U. S. Department of Agriculture, Winter Haven	292
Photoelectric Color Sorting of Early Season Florida Oranges Before Degreening, Jerome J. Gaffney, Transportation and Facilities Research Devison, Agricultural Research Service, U. S. Department of Agriculture, Gainesville, and Otto L. Lahn, Market Quality Research Division, Agricultural Research Service, U. S. Department of Agriculture, Orlando	296

Stem-End Rot Fungi in Oranges: Entry and Possible Use of Preharvest Fungicides for Control, G. Eldon Brown and W. C. Wilson, Florida Citrus Commission, University of Florida Citrus Experiment Station, Lake Alfred	301
A Colorimetric Method for 2-Aminobutane and Its Applications, F. W. Hayward, W. Grierson, University of Florida Citrus Experiment Station, Lake Alfred, and A. A. McCornack, Florida Citrus Commission, University of Florida Citrus Experiment Station, Lake Alfred	305
Instrumental and Visual Methods for Measuring Orange Juice Color, R. W. Barron, M. D. Maraulja and R. L. Huggart, Florida Citrus Commission, University Citrus Experiment Station, Lake Alfred	308
Total and Nitrate Nitroen and Solids Content of Processed Tomatoes as Affected by Fertility and Variety, John Hal Johnson, Department of Food Science, University of Florida, Gainesville, and Paul G. Orth, Sub-Tropical Experiment Station Homestead	313

KROME SECTION

The Mamey Sapote in Southern Florida, Carl W. Campbell, University of Florida Sub-Tropical Experiment Station, Homestead	318
Yellow Passionfruit Ideal for Florida Home Gardens, Julia F. Morton, Morton Collectanea, University of Miami, Coral Cables	320
Ortanique, a New Orange-Tangerine Cross, C. H. Blazquez, Citrus Research, University of the West Indies, Mona, Kingston, Jamaica, West Indies	331
Better Colored Limes Following Spray Treatments, Fran E. Fisher, University of Florida Citrus Experiment Station, Lake Alfred, William H. Krome, Homestead, Burt E. Colburn, South Florida Growers Association, Goulds, and M. F. Oberbacher, Florida Citrus Commission, University of Florida Citrus Experiment Station, Lake Alfred	391
Effects of Nitrogen and Potassium Fertilization on Persian Limes on Lakeland Fine Sand, T. W. Young, University of Florida Sub-Tropical Experiment Station, Homestead, and Robert C. J. Koo, University of Florida Citrus Experiment Station, Lake Alfred	337
Root-Knot Nematode Populations on Peaches in Florida, R. H. Sharpe, Department of Fruit Crops, University of Florida, Gainesville, and V. G. Perry, Department of Entomology, University of Florida, Gainesville	342
Characterization of Some Florida Blackberries, W. B. Sherman, Department of Fruit Crops, University of Florida, Gainesville, P. J. Westgate, Central Florida Experiment Station, University of Florida, Sanford, and G. D. Kuhn, Agricultural Extension Service, Pennsylvania State University, University Park, Pa.	344
Susceptibility to Pierce's Disease of a Plant Introduction of <i>Vitis vinifera</i> , J. A. Mortensen, Watermelon and Grape Investigations Laboratory, Leesburg, and Robert J. Knight, Jr., U. S. Department of Agriculture, Crops Research Division, Miami	348
Nucellar Embryos of the Mango, Thomas T. Sturrock, Florida Atlantic University, Boca Raton	350

Nimrod—A New Mango Variety Selected in Israel, Chanan Oppenheimer, Division of Subtropical Horticulture, Volcani Institute of Agricultural Research, Bet Dagan, Israel	358
Avocado Varieties I am Planting Now—And Why, Wm. H. Krome, Homestead	359
Adaptation of Southeast Asian Fruits, Lancetilla, Honduras and Their Potential in Florida, John Popenoe, The Fairchild Tropical Garden, Miami	354
A Decade of Banana Introductions, Wm. F. Whitman, Rare Fruit Council of South Florida, Bal Harbour	361
A Successful Method for Propagating Sapodilla Trees, Simon E. Malo, University of Florida Sub-Tropical Experiment Station, Homestead	373
Observations on the Biology Bionomics and Control of White Peach Scale, <i>Pseudaulacaspis pentagona</i> (Targ.), L. C. Kuitert, Entomology Department, IFAS, University of Florida, Gainesville	376
Physical Responses of Small Limes During Holding and Storage, W. F. Reeder and T. T. Hatton, Jr., Market Quality Research Division, U. S. Department of Agriculture, Miami	382
Thoughts on the Florida Mango Industry, Seymour Goldweber, Agricultural Extension Service, Homestead	384
Avocado Germ Plasm Evaluation: Technique Used in Screening for Cold Tolerance, W. E. Manis and R. J. Knight, Jr., Crops Research Division, Agricultural Research Service, U. S. Department of Agriculture, Miami	387

ORNAMENTAL SECTION

Influence of Nutrition on Yield, Quality, and Chemical Composition of "Tropicana" Roses on <i>Rosa fortuniana</i> Rootstock, W. E. Waters, Ridge Ornamental Horticultural Laboratory, Apopka	396
Absorption of P ³² by <i>Cattleya</i> 'Trimos' from Foliar and Root Applications, T. J. Sheehan, J. N. Joiner and J. K. Cowart, University of Florida, Gainesville....	400
Influence of Nitrogen and Lime Fertilization on <i>Gladiolus</i> Corm and Flower Production and Internal Microflora of Corms, R. H. Littrell, Coastal Plain Experiment Station, Tifton, Georgia, and W. E. Waters, Ridge Ornamental Horticultural Laboratory, Apopka	405
Factors Affecting Copper Deficiency of Container Grown <i>Ligustrum japonicum</i> , R. D. Dickey, University of Florida, Gainesville	409
Effect of Type of Container on the Growth of <i>Hibiscus rosa-sinensis</i> "Single Scarlet" Grown in Full Sun and Shade, Thomas Cochis, Jacksonville State University, Jacksonville, Alabama	412
Control of Growth and Flowering of 'Paul Mikkelsen' Poinsettias by Photoperiod and Growth Retardants, Jasper N. Joiner and Don D. Harrison, University of Florida, Gainesville	416

Variations in Yield and Quality of <i>Chrysanthemum morifolium</i> 'Iceberg' Flowers Due to Different Planting Patterns, J. N. Joiner, C. A. Conover, and T. J. Sheehan, University of Florida, Gainesville	421
Efficacy of Zinophos and Other Treatments for the Control of Mites on Gladiolus Corms in Florida, Arthur W. Engelhard, Gulf Coast Experiment Station, Bradenton	424
Stem and Needle Blight of Florida Torreya, <i>Torreya taxifolia</i> Arn., S. A. Alfieri, Jr., A. P. Martinez, and C. Wehlburg, Florida Department of Agriculture, Division of Plant Industry, Gainesville	428
Lethal Yellowing of Coconuts in Florida, A. P. Martinez, Florida Department of Agriculture, Division of Plant Industry, Gainesville, and D. A. Roberts, University of Florida, Gainesville	432
Curing Gladiolus Corms in Relation to Flower and Corms Production, R. O. Magie, Gulf Coast Experiment Station, Bradenton	436
Fungicidal Treatment of Gladiolus Corms After Harvest and Before Planting, R. O. Magie, Gulf Coast Experiment Station, Bradenton	439
Safety of Fungicides and Meta-Systox-R to Chrysanthemum Flowers in Florida, Arthur W. Engelhard, Gulf Coast Experiment Station, Bradenton	443
Phytophthora Crown Rot of Petunia in Florida, H. N. Miller and K. A. Noegel, Florida Agricultural Experiment Station, Gainesville	449
Leaf Spot of <i>Dracaena marginata</i> Lam. Caused by <i>Fusarium moniliforme</i> Sheld and its Control, C. Wehlburg and A. P. Martinez, Florida Department of Agriculture, Division of Plant Industry, Gainesville	454
Nematode Control for Ornamental Foliage Plants, J. A. Winchester, Everglades Experiment Station, Belle Glade	451
<i>Meloidogyne javanica</i> Parasitism to <i>Viola lanceolata</i> , D. E. Stokes, Division of Plant Industry, Florida Department of Agriculture, Gainesville	457
Studies on Turfgrass Insect Control in South Florida, T. L. Stringfellow, Plantation Field Laboratory, University of Florida, Fort Lauderdale	486
Comparison of Yellow Strapleaf Syndromes Produced by ANCPA and Isomers of Isoleucine, S. S. Woltz, Gulf Coast Experiment Station, Bradenton	459
Effects of Organophosphates on Gladiolus Infested with Root-Knot Nematodes, A. J. Overman, Gulf Coast Experiment Station, Bradenton	462
Copper and Other Nutrient Requirements of 'Baccara' Rose in Lightweight Potting Medium, S. E. McFadden, Florida Agricultural Experiment Station, Gainesville, and R. T. Poole, Hawaii Agricultural Experiment Station, Honolulu	480
Some Recent Developments in the Florida Flower and Nursery Industry I. General Aspects, Nursery and Bulbs, Cecil N. Smith, University of Florida, Gainesville	465
Some Recent Developments in the Florida Flower and Nursery Industry II. Flowers and Flowering Plants, Cecil N. Smith, University of Florida, Gainesville	470
Evaluation of Dombeya Introductions for New Ornamentals for Florida, P. K. Soderholm, Crops Research Division, Agricultural Research Service, U. S. Department of Agriculture, Miami	477

ANNUAL REPORTS

Necrology	493
Report of Florida Agricultural Council	496
Report of Executive Committee	496
Annual Business Meeting	497
Resolutions	497
Report of Membership Committee	498
Report of Treasurer	499
List of Members	500
Index	515
Available Proceedings	527
